

plant a seed  change the world

## CARROT *(Daucus carota)*

The classic flavor favorite. Almost coreless, 6-inch roots with bright red-orange color throughout. Crisp texture and an abundant producer. harvest in 55 days. Packet plants 40 ft.

**Gardener's Notes:** Sow seed directly in the garden in spring. Carrots need light, well-drained, sandy soil. Sprinkle seeds evenly in the row, about 3-4 per inch. Keep soil moist during germination and growth. Thin young seedlings. Sow every 2-3 weeks until early summer for continuous supply. Harvest when rounded, orange tops appear. For easier harvest, moisten soil. In mild climates, plant again in fall and winter.

### ABOUT ARGYLE

Argyle operates three wholly owned and integrated businesses. The business is run by Lachlan and Bryce Graham with the support of an experienced management team. Argyle Pastoral operates a large scale mixed farming enterprise on the fertile South West Slopes of New South Wales, with a historic Angus stud and commercial breeding and fattening herd. The cattle run on the Argyle Pastoral property are from one of the oldest genetic lines of Angus in Australia.
