### REVIEW

★★★★★

I cannot speak enough about the physiotherapy team at Medella. My mother-in-law has been struggling with her mobility and the physiotherapy team at Medella have been instrumental in helping her to walk again. I have been so impressed with the care and attention that the physiotherapy team at Medella have given to my mother-in-law. I have been so impressed with the care and attention that the physiotherapy team at Medella have given to my mother-in-law.

Richard Parker

### DIRECTOR'S MESSAGE

It has an privilege to work with such a passionate, professional and caring team of physiotherapists. It is my pleasure that I have been able to develop and support the physiotherapy team at Medella. I have been so impressed with the care and attention that the physiotherapy team at Medella have given to my mother-in-law.

Nicola Patrick  
Director of Physiotherapy

## PHYSIO IN YOUR OWN HOME

SPECIALISTS IN  
ELDERLY AND NEURO REHABILITATION

## HOW GREAT WOULD IT BE FOR YOUR CARE HOME AND YOUR RESIDENTS TO HAVE A RESPONSIVE AND APPROACHABLE TEAM OF PHYSIO'S OR OT'S ON HAND FOR WHEN YOU NEED THEM?

Medella Home Physiotherapy is a team of highly experienced and qualified physiotherapists and occupational therapists who provide in-home rehabilitation and care. We always sit the client at the centre of our talks, assessments and treatment, while being aware of the resident's wishes and recommendations on the residents' needs and the care home's operations. We believe that every care home resident who is able to help, works for their residents when they need it to improve the quality of care given and to enhance their quality of life. There are many benefits to having physiotherapists on hand for the residents and their families, friends and the managers.

### BENEFITS

**For the Residents:** We help them to stand and get them moving again! We build confidence and independence in mobility through exercises, advice and always try to meet our residents' fun and meaningful for the day, including a full day of hospital when they just want to be given the opportunity to try and walk again. We can work with them on this as well.

**For the Families:** Based on our 10 years of experience, we know that the best way to ensure your elderly loved one stays safe and independent is to prevent falls. We can provide a full physical assessment, reduce the risk of falls and maintain their independence for as long as possible.

**For the Staff:** We can provide education and support your staff in how best to look after some of the more physically challenging residents who live with their own physical health issues. We want to ensure they're aging well with confidence. We can help them to manage pain and care for an accident who has a change in mobility or an incontinence issue, to be able to care for the resident.

**For the Managers:** Having a team of physiotherapists and occupational therapists on hand for your care home is a great benefit for you and your residents. We are able to work with you and your staff to ensure you have the best care for your residents. We can provide a full physical assessment, reduce the risk of falls and maintain their independence for as long as possible.

## WHAT WE CAN DO IN CARE HOMES

**Personalised Physiotherapy for residents who want to stand and walk again!**

**Block Dressing:** We are able to provide a full range of care from basic to what you need to help. We can see many patients in care homes that have provided a great service. This is a great service to provide in care homes. We can provide a full range of care from basic to what you need to help. We can see many patients in care homes that have provided a great service. This is a great service to provide in care homes.

**Rehabilitation in Respite:** For those in care homes for a temporary placement, it's important that they continue with their rehabilitation programme to help maintain their independence and ability. Following their time in respite, it's extremely engaging with rehabilitation experts. The residents will have a much higher level of independence in a short space of time. For residents that are considering returning home we can provide comprehensive home assessments to ensure the environment is suitable, adjustments are made and they are safe to return - we will work with you to consider their own needs and cognitive safety. When they return to their own homes following respite, we can provide a full range of physiotherapy for them in their own homes.
