Megamenu Builder

Build Megamenu Content with Elementor Addon

- Build content in WordPress with Elementor page builder.
- Use any element/widgets you like.
- 100% responsive.
- Necessary Elementor addons.
- Add a badge/ icon wherever you need it.
- Off-canvas style in tablet view.
- Show builder content or simple lists as a submenu in tablet view.

▶ Live Demo

Extendable Custom Controls

Integrated with Powerful New Controls

We have developed some custom controls like Multi Widgets area, AjaxSELECT2, and Image-picker which can be used in any Elementor theme and plugin by their hooks.
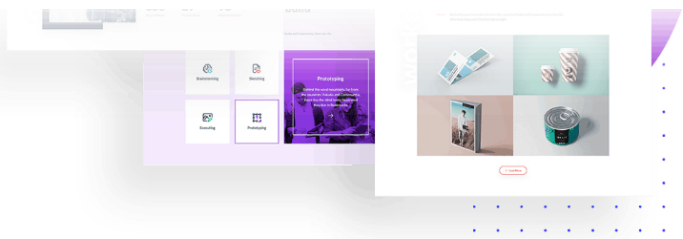

Multi widgets are specially built for using WordPress widgets inside another widget without any hassle.

We've used it on the Advanced tab, Advanced accordion, and Off-canvas widgets in ElementsKit. You will also get all the necessary Elementor addons for building any page you want!

Now it's too easy to create complex creative website designs in minutes. Get amused!

Testimonials

What WordPressians Say
About ElementsKit

★★★★★

Probably best Widgets add-on for Elementor

Love the high quality of design each widget
haves, and for each widget there are like 10
different examples. Also they didn't bother to
include every demo they showcased so you
can easily import it on your website!

@djekanovic

★★★★★

Easy, simple, and beautiful.

This plugin is perfect!! I could make a nice
layout with just one click. The design is
beautiful, and there are various layouts.
Above all, it is very simple and easy. This is
the function I really wanted. Also, their
support services are excellent. I solved the
problem with my theme immediately. They
are a great team and this plugin is very
useful. Thank you for providing this wonderful
plugin.

@taxlawmen

★★★★★

Super helpful customer support

Super helpful customer support! This plugin
has a lot of potential to become a must have
addon for elementor. Even the features they
are offering now, gives so much value.

@heikkivihersalo

★★★★★

Incredible Customer Support & Plugin

I love this plugin. I've found that a lot of
premium templates are being built on top of
it, as the extra elements give so much
flexibility and design power. Also, their
customer support is top-notch. They answer
every email every day and even help with
stuff that's not an issue with their plugin!

★★★★★

Works like a charm

Happy to have discovered this and upgraded
to the pro as well. While the free version itself
is loaded with features, the pro version
helped ignite my sites building to the next

★★★★★

Superb plugin !! Useful for WooCommerce

Basically I was looking for a woo-commerce
product listing plugin and I found Ekit.
Downloaded it successfully. After few hours
of using it, I wondered that it's not only a
plugin for woocommerce but also a
comprehensive solution for Website
development that covers everything. Thnks
ElementsKit!!

stuff that's not an issue with their plugin! They make custom code suggestions, give troubleshooting tips, and overall just make it an easy process to use their tools. Keep up the great work!

@marketdesignteam

helped ignite my sites building to the next level. Helps avoid having multiple elementor add on plugins. Support is also quick and knowledgable. Most of all I liked their templates library with widget presets, which helped speed up my site building.

@vishywordpress

Elementskit!!

@productspeep

★★★★★
Complete Elementor Add-on

With so many beautiful Shortcodes, Header-Footer Builder, Mega Menu, Elements Kit save our theme development time frame and its huge. Widgets are nice alternatives to the default Elementor Builder we can rely on.

@themefunction

★★★★★
Easy to use and great support

I am looking for elementor addon that easy to use and give block to start my new site, luckily i found elementkit, its easy to use and very good quality. thanks

@ariekoprasethio

★★★★★
Amazing Plugin

I wanted to checkout the free version before committing to buying the Pro, and I quickly saw this plugin and those behind it are legit! Easy of use, very customizable, and so many great modern options! #winWIN with ElementsKit 💯
