Amelia is perfect for

Law consultants
Schedule meetings, list the services, collect payments, manage staff.

Gym & sports
Allow clients to choose, book and pay for their group or individual training with ease.

Private clinics
Appointment scheduling, medical services catalog, payments, and other tools.

Spa salons
Launch a comprehensive online receptionist desk for your Spa or Massage salon.

Repair centers
List the repair services you provide, servicemen and their availability.

Beauty salons
Allow customers to choose a stylist, browse procedures and book visit in advance.

Give your business a

professional and trustworthy feel.

We build Amelia using latest technology stack, modern design, and user experience techniques. It allows you to provide an enterprise-level smooth booking experience for your customers, without investing in branding or making deep changes to your work process.

Frontend Demo   Backend Demo

Focus on your work, and forget about having to pay assistants.

Amelia will fully automate the interaction with potential customers, help them pick the and employee, taright serviceke care of the payments, real-time SMS reminders both for the customer and employee for canceled or rescheduled appointments. You can focus on your significant work instead of interrupting your flow to write down appointments. And no need anymore to depend on a secretary on the phone!

Business consultancy

⭐ ⭐

I QUALITY

is simply amazing, no
xactly what a client needs
I'm very happy I purchased
s better than anything else
grate to PayPal, Google

⭐⭐⭐⭐⭐

FOR DESIGN QUALITY

We've bought Amelia for a website of a small barbershop we develop right now. We were a bit hesitant as with new products you never know, but it looked so compelling we decided to give it a try.

⭐ ⭐

FOR DESIC

Fantastic plugin and

>

Rom

Amelia Booking Plugin powers thousands of businesses and received
recognition from leading industry websites:

speckyboy

"There are many good reasons to use
Amelia. One of them is the opportunity to
advance your business' professional look.
Amelia doesn't require any training to use,
and there's little effort involved in setting
it up. Thus, it's easy to take it on a trial run
to see how it will work for you and your
team."

WP Buffs

"Amelia's admin panel is quite rich,
providing business owners, managers and
vendors with comprehensive tools for
appointment flow management."

View Article >

ATHEMES

"What separates Amelia from other
booking solutions is the level of control it
gives you over everything. It is a highly
customisable solution that helps you tailor
booking forms to your business."

View Article >

"You'll never miss an appointment or a
potential appointment again. You can
throw out the garbage without fear of
losing a necessary paper with the
appointment info on it. Amelia will get
everything is in one place and perfectly
organized. You can enjoy focusing on
important tasks without interruptions."

Insightful Admin Dashboard

Amelia provides business owners and managers with a dashboard page that
summarizes all business-critical KPIs and displays them in widgets, charts, and
tables that allow checking the performance with a 5 seconds glance.

Step-by-step Booking Wizard

One of the front-end views provided by Amelia is a classic step-by-step booking process, implemented with a focus on smooth UX in a single-page-app style. Customers can quickly pick services, employees, location, date and time, and the payment details, and change any of the settings without leaving the page.

Admin Calendar View

Admin and employees can track the appointments in a dynamic calendar view. The calendar can present appointments for monthly, weekly, daily and timeline view, and can be filtered by employee, location, service or service category.

Search Booking Widget

Amelia allows you to provide your users with a search interface, where services and time slots will be suggested by one or more search criteria, such as preferred date, preferred time range, preferred service or category.

Customizable Design

Amelia has a minimalistic user interface, with only several colors used in the design, which you can quickly adjust to match your theme and your business branding best.
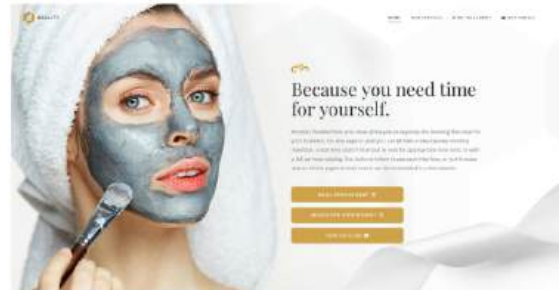

Amelia Demos

Pick a demo site which looks closest to your industry. All demo sites are built using popular ThemeForest WordPress Themes.

Medical / Health
A website of a fake private clinic, where a visitor can read about provided medical procedures and services, and schedule an appointment.

Frontend Demo   Backend Demo

Beauty and cosmetology
A dummy cosmetology website - look through different cosmetic procedures and treatments, pick an employee and book an appointment.

Frontend Demo   Backend Demo

Fitness Gym / Yoga
A pseudo Yoga gym website, where one can browse through possible Yoga classes, and schedule individual training.

Frontend Demo   Backend Demo

Consulting
A pseudo Business Consultant / Coach / Lawyer website, where a customer can browse through provided consultancy and lawyer services and book an appointment.

Frontend Demo   Backend Demo

Multiple Employees support

Whether you work alone or have a team of 20 people working in shifts, Amelia will provide all the tools for scheduling and booking.

Multiple Services and Extras

Add as many services as you want, group these in categories, configure duration, buffer time before and after each service, and configure service extras.

Integrates with Calendars and payment providers

Sync Amelia with your Google Calendar, accept payments through PayPal or Stripe, or integrate it with your WooCommerce installation.

3 front-end views

Amelia introduces 3 WordPress shortcodes that you can insert in any post or page. These shortcodes generate 3 front-end views: Booking Search, Step-by-step booking and Services Catalog view.

Extensive admin panel

Amelia presents a very rich toolset on the back-end - a dashboard with stats and KPIs, calendar view appointment,employees, services and locations management, and other pages.

Realtime SMS Notifications

Keep your customers and employees notified and reminded in real-time about their appointments with SMS notifications.
