s are limitless..

lighting in your home conveniently

- The system motion sensor will report movement and email you that someone is in your house.
- The same motion sensor can be used to detect rising temperatures. Place one in any important area to alert you to the conditions in the room. The sensor also monitors light level and can be used to turn on exterior lighting as darkness falls.
- Integrate IP based cameras for a total solution.

**Wondering about flood sensor?**

- A flood sensor can alert you to potentially costly water damage.

and been built by 2-Week technology.  
can't use with connects to your internet router  
control wherever you are.  
can send water to your house.
