THROUGH THE HOLOGRAM

In this ground-breaking book *Through the Hologram*, Ph.D. physicist and international speaker, Dr. Theresa Bullard, teams up with Gudni Gudnason, visionary, spiritual leader, and mystery school founder to merge their expertise in modern physics and ancient metaphysics for a new look at some of life's biggest questions.

Have you ever wondered: "Who am I?", "What is the role of humans in the Universe?", "What is real?", "Are we living in a Hologram or Matrix?" This book goes to the core of these essential questions. In searching for the answers, the authors lead you on a journey of exploring both the Macrocosm and the Microcosm, the physics of how this Universe works, as well as the metaphysics of who we are as humans, and what role we play in this grand creation. *Through the Hologram* especially explores this through the lens of the latest scientific evidence for a Holographic Universe.

What does modern science reveal and how does this match up with ancient wisdom teachings? The answers provide insights into how we can make a leap in human consciousness and breakthrough to our next level of evolution. Beyond the science, this book is about how to awaken to our true potential and mastery of this experience of life.

Dr. Theresa Bullard is a Ph.D. physicist, international speaker, TV host of *Mystery Teachings*, and recognized leader in bridging science and spirituality. After 14 years of conducting experimental research in neutrino physics, crystal chemistry, nanoscience, and origin of life theories, Dr. Theresa realized how essential it is to balance scientific advancement with spiritual wisdom. For over two decades, she explored deeply into the western mystery school initiations and teachings of Hermetics, Kabbalah, and Alchemy, quickly realizing the parallels that exist between quantum physics and these ancient traditions. In her work, she expertly weaves together these diverse fields to bring us real-world ways in which we can deepen our spiritual connections and tap into our unlimited potential.
